

ENTOMOL 597A: Insect-Plant Interactions

Instructor: Lynn Adler

Class number: 39674

Schedule: TuTh 11:15-12:30

Course Description: This course will cover the ecology and evolution of insect-plant interactions in basic and applied contexts. We will use formal lectures, interactive discussions, and readings from the primary literature to examine major current concepts in this field.

This course will have a **Community Service Learning (CSL)** component at a local Food Bank farm for hands-on experience with insect-plant interactions while providing service to our community.

Grades will be based on written assignments, take-home exams, an oral presentation, and class participation.
